AGENDA ITEM 08: Change of Nomenclature of One (01) National Occupational Standards (NOS) Received from Capital Goods and Strategic Skill Council (CGSSC)

- 8.1. During the 36th meeting of the National Skills Qualifications Committee (NSQC), held on 15th March 2024, the National Occupational Standard (NOS) named "Overhead Gantry Crane Operator" (CSC/N1205), developed by CGSSC was NSQF-aligned and approved.
- 8.2. Subsequently, NCVET received a communication dated 27th September 2024 from CGSSC, requesting a change in the nomenclature of the NOS from "Overhead Gantry Crane Operator" to "Overhead Crane Operator" indicating that the training and certification did not exactly align with the name "Overhead Gantry Crane Operator." Consequently, industry experts recommended that "Overhead Crane Operator" is a more appropriate name for the course. This change in nomenclature has also been validated by 10 industries that had previously vetted the course.
- 8.3. Based on the above, it is proposed that the name of NOS "Overhead Gantry Crane Operator" may be changed to **"Overhead Crane Operator"**.

S. No.	Existing Name	NOS code	NQR CODE	Proposed Name	NSQF Level
1	Overhead Gantry Crane Operator	CSC/N1205	NG-04-CG-02168-2024-V1-CGSC	Overhead Crane Operator	4

The agenda is placed for approval by the Committee.

AGENDA ITEM 09: Submission of Qualifications for NSQF Alignment & Approval

- 9.1. It is observed that many ABs have pendencies with respect to uploading of NSQF aligned and approved qualifications on NQR. As a result, these are not visible on NQR and cannot be taken up for training. Merely getting qualifications approved without timely uploading on NQR makes the exercise infructuous. It is therefore proposed that the qualification of ABs who have a pendency in terms of uploading on NQR, shall, henceforth not be taken up for NSQF alignment and approval till such time the pendency is resolved.
- 9.2. For the present NSQC, a total of 274 Qualification/NOSs/MCs have been received at NCVET till July 2024. Of the above, total **132** Qualification/NOSs/MC are being placed for consideration of NSQC. The details of the same are as below:

The role involves managing the cutting team, ensuring the quality of the cut pieces, and minimizing fabric wastage. Evidence of Need: The shift toward export-oriented production has led to improved efficiency. According to the Apparel Export Promotion Council (AEPC), the cutting room has an estimated 15-20% shortfall in skilled supervisors and is further exacerbated by increasing complexity of garment designs and need for precise cutting in high-volume production environments. This qualification therefore holds demand for the large apparel and home furnishings exporters.

It supports the local economy of the villages as well. • Consumers today prefer natural fibers like jute, coir, hemp, and bamboo for their durability and minimal environmental impact. Natural fibres are not only being used for making home decors and utility items, but they are also gaining popularity as they are being used to make footwear and garments. • Keeping in mind the usage and benefits of natural fibre, we have introduced kauna grass in the existing NOS, and one additional NOS had been made, which tells about hemp fibre and nettle leaf fibre
